

## **Environmental/Green Benefits**

Shifting to an electronic plan submission and review process is one of the City's efforts to go green and improve the sustainability of our operations. This is part of the Mayor's Office of Sustainability's strategic plan.

ePLANS saves us:

- 312,000 miles driven & 20,800 gallons of gas
- 192,000 lbs. of paper used (239 trees)
- \$57,200 in fuel costs
- 457,600 lbs. carbon monoxide emitted
- 12,480 hours of driving time
- Approximately 12,000 lbs. of paper requiring storage

*NOTE: The Green Benefits represents reduced storage of plans for a community issuing 3,000 permits annually.*
