Capital Improvements Program

INTRODUCTION

The City of Atlanta's Capital Improvements Program (CIP), updated annually, is an implementation plan for the construction, maintenance, and renovation of public facilities and infrastructure. The CIP shows the allocation of projected expenditures for capital projects expected over the next five years.

The CIP includes those items typically considered as *"infrastructure"*—streets, sewer lines, bridges, etc., as well as facilities through which City government provides services directly to citizens or in support of City operations. The latter category includes such facilities as police precincts, recreation amenities, maintenance facilities, and general office buildings. The CIP covers all facilities that City government owns and has responsibility for. It includes facilities of both general government operations and enterprise operations. The Water and Sewer System and Hartsfield-Jackson Atlanta International Airport are enterprise operations. The enterprise operations are self-supporting and generate their own capital funds through revenue bonding or operating revenues, while general government capital improvements rely on annual bond issues and voter approved general obligation bonds, as well as general and internal service funds, and dedicated tax millage and grants.

The CIP document is submitted with the Community Work Program (CWP) to the Atlanta Regional Commission (ARC) and to the Georgia Department of Community Affairs (DCA), as required by the Georgia Planning Act, in order for the City of Atlanta to maintain its Qualified Local Government (QLG) status. The CIP/CWP has to be adopted every year by October 31st. QLG status makes the City of Atlanta eligible for various state and regional funding and to collect impact fees. Some of the state programs linked to the QLG designation are: Local Development Fund grants, CDBG Loan Guarantee Fund Program (Section 108 Program), Georgia Finance Authority funding and Georgia Department of Natural Resources grants, among others.

Capital Improvements - Definitions

The CIP identifies major improvements and capital purchases needed to improve services to the community. A Capital Improvement Project must meet one of the following criteria:

- Real property acquisition (Land)
- Construction of a new facility
- Addition (a modification that changes the structural "footprint" of the facility) to existing facilities greater than or equal to \$25,000
- Remodeling/repair/preservation of the interior/exterior of any facility greater than or equal to \$25,000
- Demolition of existing facilities greater than or equal to \$25,000
- Major equipment items or projects including computer infrastructure, which as a whole are greater than or equal to \$25,000 (excludes vehicles unless \geq \$50,000)

Capital Improvements Program

- Infrastructure projects (a road, bridge, intersection, drainage system, or sewer structure, etc.)

As noted, the City CIP covers City government capital projects only. These projects are carried out to provide the facilities for the provision of City services, and to support, encourage and shape the direction of private development. Many other factors influence infrastructure development in the City, such as the Metropolitan Atlanta Rapid Transit Authority (MARTA), the Atlanta Housing Authority, Tax Allocation Districts, the State and Federal Governments, Community Improvement Districts and the Atlanta Board of Education. Also, private developments directly interact with the future and direction of City growth, requiring City involvement and support and providing the opportunity to leverage private investment with City resources.

CIP/CWP Plan Development and Approval

The CIP Subcabinet, a committee comprised of representatives from each City Department, was responsible for developing project listings based on identified and projected needs. Each department is responsible for completing the information for each project listed in the CIP and for ensuring projects included in the document could be linked to identified funding sources.

The management and implementation of projects in each specific chapter are the Department's responsibility. The Office of Planning in the Department of Planning and Community Development is responsible for preparing the CIP document and for reviewing the CIP. Through its Capital Budgeting Process, the Department of Finance is responsible for making recommendations as to funding sources and schedules.

After an initial public hearing on June 8, 2015 and approval of the transmittal resolution from City Council on June 15, 2015, the CIP/CWP was transmitted the Atlanta Regional Commission (ARC) and Department of Community Affairs for a 60 day review. The second public hearing will be on September 14, 2015 and afterwards, the CIP/CWP will be before City Council for adoption.

Funding Sources for the Capital Improvements Program

The City of Atlanta Department of Finance develops its capital projects budget annually based on its Capital Improvements Program process. This process is the mechanism for operating departments to request programming of funds for future capital needs, and is designed to coordinate capital projects requirements with available resources. The unfunded list of capital projects listed in the CWP project list are potential candidates for the inclusion in the five year capital budget

The appropriation of funds for capital projects is accomplished through the City's normal budget process. Other funds, such as grants and bond proceeds, are appropriated whenever they are

Capital Improvements Program

received or awarded during the course of the fiscal year. Items programmed in the CIP to be funded from expected revenues are still subject to appropriation in the normal budget process.

2015 Renew Atlanta Infrastructure Bond

On March 17, 2015 the Renew Atlanta Infrastructure bond was approved by residents of the City of Atlanta. The bond is composed of \$187,945,000 General Obligation Public Improvement Bonds for transportation projects that includes public streets, traffic control, equipment, bridges, viaducts, ADA, bicycle and pedestrian projects, and \$64,055,000 in General Obligation Public Improvement Bonds for Municipal Facilities. Both bonds total \$252 million in public improvement capital outlay projects. The projects to be funded by these bonds will be included in the Capital Improvements section of this document. The Transportation Projects are listed in Appendix E.

The Capital Improvements Program Document

The CIP includes a total of 153 projects with a preliminary estimated cost of approximately \$1,830,628,317. The table below summarizes the funded capital projects included in the 2016-2020 CIP/CWP.

Capital Improvements Program

The Capital Improvements Program document has been designed to be informative and user friendly for all of the stakeholders interested in the City's capital projects. The data for each project included in the CIP is pulled from a relational database that the members of the CIP Sub-Cabinet committee (departments and agencies involved in the CIP process) have access to for data entry.

The CIP is divided into departmental chapters. The chapter for each department includes the Department mission statement, followed by a table that summarizes all of the capital projects for that department. This summary includes the project's capital improvement identification, project name, estimated cost, Council District and current project status. Following the summary, each capital project is listed individually. The project name and number, estimated cost, funding source, description, project type, project phase, start and end date, Council District(s) and Neighborhood Planning Unit(s) (NPU), and a general location map is included.

The project phase identified in each capital project is the current phase of the project. This is also identified in the summary table for each department as the project status. The following phases can be attributed to an individual project:

- **Planning:** The process of the design phase based on the needs and requirements collected in the conceptual phase. This includes scheduling, developing solutions to needs and requirements, setting up the functional specifications and cost estimates.
- **Concept:** Pre-design phase that explores design ideas which are plausible and sets up situational constraints in order to generate new options.
- **Design:** An implementation on the foundational analysis, solutions and specifications developed in the initial stages.
- **Environmental Clearance:** The National Environmental Policy Act (NEPA) of 1969 established protocol by which agencies are required to evaluate projects impacts on the social and natural environment. There are three levels of Environmental Clearance: Categorical Exclusion, Environmental Assessment (EA), and Environmental Impact Statement (EIS).
- **Property Acquisition:** The process of acquiring properties or land necessary to build a project.
- **Utility Coordination:** Effectively identify utilities and resolve conflicts on proposed plans.
- **Final Design:** The detailed architectural and engineering drawings of all physical components of the project are produced.
- **Bid and Award:** The process of submitting a proposal with a cost estimate and a contractual agreement on the bid offer and proposal of both parties.
- **Construction:** The development of the project is in process.
- **Close Out:** The process when the project's construction is finished and is in a period of acceptance or rejection of the construction.

Capital Improvements Program

- Completed: The project has been executed and will be included in Appendix B: List of Completed Projects if the project was completed from January 1, 2011 to June 30, 2014.
- Cancelled/Dropped: A project can be cancelled or dropped. These projects will not be included in the Capital Improvement Programs project list.

The Connection between the Capital Improvements Program & The Comprehensive Development Plan

The Community Agenda portion of the Comprehensive Development Plan includes policies, programs and projects needed to implement the Comprehensive Plan over the next 15 to 20 years. That list of programs and projects is updated annually in the document known as the Community Work Program or the CDP Project List. The CWP is the second portion of this document. As funding for a capital project is identified, then that capital project is also listed in the Capital Improvement Program.

Impact Fee Capital Improvement Element (CIE)

The City of Atlanta Development Impact Fee Ordinance was adopted by the Atlanta City Council on March 18, 1993 in accordance with the Authority provided by Article 9, Section 2, paragraph 4 of the Constitution of the State of Georgia and the Georgia Development Impact Fee Act (DIFA) (Title 36, Chapter 71, Official Code of Georgia Annotated). The ordinance is currently being updated.

In order to collect impact fees, the City of Atlanta has to complete a Capital Improvement Element (CIE) every year. The CIE has two components: an Annual Financial Report and a Schedule of Improvements. The Annual Financial Report provides an overview of impact fees collected, encumbered and used by category of public facility and service area for the last completed fiscal year. The Schedule of Improvements identifies capital projects to be financed in whole or in part by impact fees during the upcoming five years. The Impact Fee Capital Improvement Element is in Appendix A.

List of Completed Projects

A list of capital projects completed over the last several years is in Appendix B. The list is organized by the Department. For each completed project, the project name, description, completion date, estimated cost, Council District and NPU is included.

Public Art Program

Since its start in 1977, the City of Atlanta Public Art program has supported the creation of public art through the Percent-for-Art Ordinance. The ordinance requires that a percentage of major capital improvement projects' construction be set aside for public art. The ordinance identifies the funds (grant funds, general obligation bonds, revenue bonds, general funds) and

Capital Improvements Program

the types of projects (new construction or remodeling, parking facilities, street and streetscape improvements) that participate in the 1.5% percent allocation for public art.

The Public Art Program is administered by the Office of Cultural Affairs Public Art Program Manager in the Executive Offices of the Mayor. The Public Art Master Plan is the guide for the development, administration and conservation of public art. A Public Art Advisory Committee advises on the implementation of the master plan. The percent for the art should be identified as soon as the Capital Improvement Program budget is established. This ensures that planning for the public art is included in the project's development.

District(s):	All	Funded:	\$1,757,490.00
NPU(s):	All	Shortfall:	\$0.00
Description:	The Testing and Analysis of Large Meters project is a system-wide asset management program designed to test the efficiency, accuracy, and performance of existing large meters 3 inches in diameter and greater and in accordance with AWWA standards. The calibration of these meters ensures that the meter is capable of measuring water that is within engineering tolerance when used within the intended environmental conditions over some reasonable period of time. The testing and analysis of large water meters should be performed every other year. There are approximately 3,000 large meters in the distribution system to be tested.		

North Area Main Improvements (Northside Drive)

Project Number:

98.04.019

Project Type:	Infrastructure	Phase:	Construction
Project Start Date:	May 2006	Estimated	
Project End Date:	September 2015	Project Cost:	\$17,558,588.00
District(s):	2,3,6,7,8,9,10	Funded:	\$17,558,588.00
NPU(s):	A,C,D,E,F,J,K,L,N	Shortfall:	\$0.00
Description:	This project will abandon the existing 20-inch water main that is undersized and more than half its useful life with a 36-inch transmission-only and a 12-in distribution Ductile Iron Pipe (DIP) within Northside Dr from 14th Street to Moores Mill Rd. The 12,880 linear feet (LF) of 36-in DIP will ensure there is a reliable water source between the Hemphill Pumping Station and the Northside Pumping Station for customers in the North Area of the distribution system to maintain adequate water pressure during peak and emergency demand conditions.		

Raising Valve and Manhole Covers: Annual Contract

Project Number: DWM--3586

Project Type:	Infrastructure	Phase:	Bid and Award
Project Start Date:	September 2014	Estimated	
Project End Date:	September 2017	Project Cost:	\$2,000,000.00
District(s):	All	Funded:	\$2,000,000.00
NPU(s):	All	Shortfall:	\$0.00

Description: Annual contract for system-wide repair and replacement of 6, 8, and 12 inch valves, raising of manhole and valve covers, and restoration needed to include asphalt replacement and pavement concrete of various sizes. The repair and replacement of 6, 8, and 12 inch valves will supplement the regular maintenance/repair schedule of the DWM Office of Linear Infrastructure Operations ability to repair/replace valves after internal resources/efforts have been exhausted and in emergency situations. This project also provides for the raising of valves and manhole covers in response to road projects being constructed by the City of Atlanta and outside agencies.

Sewer Rehabilitation Contracts A & C (Annual)

Project Number: DWM--3601

Project Type:	Infrastructure	Phase:	Construction
Project Start Date:	March 2011	Estimated	
Project End Date:	October 2014	Project Cost:	\$14,274,421.00
District(s):	All	Funded:	\$14,274,421.00
NPU(s):	All	Shortfall:	\$0.00

Description: This project will consist of rehabilitation work discovered from SSES efforts. The project will be set up as an undefined contract. Work orders will be issued based upon the SSES data, modeling output and rehabilitation design criteria for all sewers.

R. M. Clayton Water Reclamation Center (WRC) - Compliance Upgrades Phase II

Project Number: DWM--3693

Project Type:	Infrastructure	Phase:	Construction
Project Start Date:	February 2012	Estimated	
Project End Date:	August 2014	Project Cost:	\$1,499,601.00
District(s):	9	Funded:	\$1,499,601.00
NPU(s):	C,D	Shortfall:	\$0.00

Description: The RM Clayton WRC Compliance Upgrade project will provide important primary, secondary and tertiary treatment upgrades and additions to the RM Clayton Water Reclamation Center (WRC). These upgrades will be in addition to the ongoing remedial work being constructed to address the September 2009 flood damage. This project will upgrade the primary clarifiers, primary sludge headhouse, blower building, Nancy Creek pump station odor control, etc.

East Atlanta Water Main Replacement (College Avenue)

Project Number: DWM--3698

Project Type:	Infrastructure	Phase:	Construction
Project Start Date:	August 2015	Estimated	
Project End Date:	August 2016	Project Cost:	\$3,603,000.00
District(s):	5	Funded:	\$3,603,000.00
NPU(s):	O	Shortfall:	\$0.00
Description:	This project shall replace existing water main piping with 8 inch ductile iron pipe and associated appurtenances on and around College Avenue in East Atlanta.		

New Water Meter Installation - Small Meter: Annual Contract

Project Number: DWM--3706

Project Type:	Infrastructure	Phase:	Bid and Award
Project Start Date:	September 2014	Estimated	
Project End Date:	September 2017	Project Cost:	\$2,000,000.00
District(s):	All	Funded:	\$2,000,000.00
NPU(s):	All	Shortfall:	\$0.00
Description:	This project consists of the system-wide installation of water meters sizes 3/4 inches through 2 inches. The Work under this Agreement consists of providing installation and replacement of small water meters and service lines on an on-demand basis as authorized by the Department of Watershed Management (DWM) through Work Orders issued by DWM for specific items of Work. The work shall include furnishing all parts, labor, equipment, materials and appliances, and performing all directed repairs and replacements throughout all of the City of Atlanta Water Distribution System.		

Sewer Group [2R] - Sandy Creek Outfall Replacement Project

Project Number: DWM--3744

Project Type:	Infrastructure	Phase:	Close Out
Project Start Date:	September 2012	Estimated	
Project End Date:	February 2014	Project Cost:	\$2,982,536.00
District(s):	9	Funded:	\$2,982,536.00
NPU(s):	D	Shortfall:	\$0.00
Description:	The City of Atlanta is presently implementing a program to upgrade its existing sanitary and sewer system to eliminate sanitary sewer overflows. To this objective, the City is proposing a series of system improvements which includes this project. The Sandy Creek Outfall Replacement Project is divided into two phases: Sandy Creek Sewer Replacement Phase I and Sandy Creek Sewer Replacement Phase II.		

Sewer Group [5R] - Peachtree Basin South Fork Storage and Pump Station

Project Number: DWM--3745

Project Type:	Infrastructure	Phase:	Construction
Project Start Date:	August 2012	Estimated	
Project End Date:	July 2014	Project Cost:	\$40,000,000.00
District(s):	3,9,10	Funded:	\$40,000,000.00
NPU(s):	V,W	Shortfall:	\$0.00
Description:	The project consists of a proposed 15-mgd deep submersible pump station and 4.5 MG storage cavern to capture and store wet weather flows from DeKalb County. The proposed site is located on the South Fork Peachtree Creek Relief sewer, near the intersection of Peachtree Creek and Briarcliff Road. Wet weather flows, primarily from DeKalb County, will be diverted to the storage facility. The storage and pumping system will significantly reduce the capacity demand on the existing Peachtree Trunk and Peachtree Trunk Relief, both of which experience significant surcharge and incidence of spills during wet weather events.		

Randall Hall Sanitary Sewer Improvements

Project Number: DWM--3785

Project Type:	Infrastructure	Phase:	Bid and Award
Project Start Date:		Estimated	
Project End Date:		Project Cost:	\$1,263,096.00
District(s):	8	Funded:	\$1,263,096.00
NPU(s):	A	Shortfall:	\$0.00
Description:	This project will connect this existing dry sewer line on Randall Hall to the City of Atlanta sewer system with a reverse grade, open-cut, 8-inch ductile iron pipe from 3665 Randall Hall to Foxcroft I Road. The new sewer will connect to the City's existing 8-inch sewer system on Foxcroft Road. A minimum grade for the new sewer will be used to limit the depth of the new sewer line to less than 30 feet. This alignment allows for future connections of over 30 residences when septic tank drain field systems fail in the future.		

Downtown Water Storage Tanks and Pump Stations

Project Number: DWM--3786

Project Type:	Infrastructure	Phase:	Bid and Award
Project Start Date:	December 2014	Estimated	
Project End Date:	June 2016	Project Cost:	\$43,411,150.00
District(s):	5,12	Funded:	\$43,411,150.00
NPU(s):	N,V	Shortfall:	\$0.00
Description:	The Downtown Water Storage Tanks and Pump Stations project involves the design and construction of two finished water storage tanks and pump station facilities that will provide finished water storage for the downtown Atlanta area. The 12 million gallon east tank will provide service for the area east of the Peachtree ridge and the 7 million gallon west tank will serve the area west of the ridge.		

Raw Water Transmission Mains - CSX

Project Number: DWM--3787

Project Type:	Infrastructure	Phase:	Bid and Award
Project Start Date:	October 2014	Estimated	
Project End Date:		Project Cost:	\$10,596,499.00
District(s):	All	Funded:	\$10,596,499.00
NPU(s):	All	Shortfall:	\$0.00

Description: Cleaning and renewal of 4094 LF of existing 36-inch, 30-inch, and 48-inch diameter cast iron pipe that is currently out of service. In order to create access to the pipe interior, eleven (11) temporary access pits will be excavated and the pipe will be cut open in those locations to allow for the removal and subsequent replacement of the original spool pieces. Upon completion of pipeline cleaning and renewal, the excavations will be backfilled and the ground or pavement restored.

Hemphill Reservoir #1 Embankment Repair

Project Number: DWM--3788

Project Type:	Infrastructure	Phase:	Construction
Project Start Date:	November 2014	Estimated	
Project End Date:	August 2015	Project Cost:	\$3,683,582.00
District(s):	8,9	Funded:	\$3,683,582.00
NPU(s):	D	Shortfall:	\$0.00

Description: This project implements corrective action required by the Georgia Department of Natural Resources (DNR) Safe Dams Group which would enable the Hemphill Reservoir #1 to be returned back to active service. Corrective action includes specified placement of additional soil on the dam slope, construction of a permanent drainage system, and minor embankment erosion and revetment repairs to both Reservoir #1 and #2.

Sewer Cleaning and Pipeline Assessment: Annual Contract [2012-2019]

Project Number: DWM--3791

Project Type:	Infrastructure	Phase:	Bid and Award
Project Start Date:		Estimated	
Project End Date:		Project Cost:	\$3,000,000.00
District(s):	All	Funded:	\$3,000,000.00
NPU(s):	All	Shortfall:	\$0.00

Description: Citywide program of closed circuit TV (CCTV) inspection of existing pipeline condition and heavy cleaning. Following the completion of the SSES Activities two categories of on-going inspection will be needed. The first category identifies sewers requiring immediate rehabilitation. This work will be accomplished by the Sewer Group 1-6 sewer rehabilitation work. This project accomplishes the second category of needed work and provides routine sewer maintenance including, cleaning, root treatment, replacement of clean-out covers and CCTV monitoring, including any necessary remedial action.

Community Work Program

Introduction

The Community Work Program (CWP), also known as the Comprehensive Development Plan's (CDP) Project List and formerly as the Short Term Work Program (STWP), is a key implementation tool of the Comprehensive Development Plan. It is a list of the major actions to be undertaken by the City of Atlanta to implement to meet the CDP's recommendations over the next 15 to 20 years.

In order to maintain Qualified Local Government (QLG) status under the Georgia Planning Act, the City of Atlanta must have an adopted Community Work Program (CWP) for implementation of the Comprehensive Plan. The City of Atlanta updates its CWP/CDP Project list annually and submits it to the Atlanta Regional Commission (ARC) and the Georgia Department of Community Affairs (DCA) for review and comment.

The CWP/CDP Project List includes a description of community and economic development initiatives, programs, major capital improvements, infrastructure expansions, regulatory measures, and land development regulations to be adopted or amended. The CWP/CDP Project List includes partially funded, as well as unfunded projects as well as programs. A project must be in CWP/CDP Project List before it can be moved to the Capital Improvements Element project list.

For each item listed in the CWP/CDP Project List, the project name, a description of each project, estimated project cost, potential funding sources (Impact Fee, Potential Private/Foundation, Local, Regional, Federal, or TBA), Council Districts, and Neighborhood Planning Units (NPU) are listed, as provided. Estimated project costs may not apply to certain projects and programs or have yet to be identified.

The CWP can be amended several ways: during the annual update process, by the adoption by City Council of a plan and the list of projects recommended by a plan, as a result of a Development of Regional Impact review or when a project is identified for impact fee funding. In addition, NPUs are asked to submit projects for their NPU annually during the CWP/CDP Project List update.

14	Sewer Asset Management	<p>Under the Consent Decree the City of Atlanta has inspected every foot of sewer through the SSES program. All condition assessments have been loaded into the CMMS system for the purpose of establishing a true asset management program. This program is designed to keep the system in top operating condition throughout the life of the utility.</p> <p>Some of the assets inspected, were inspected up to ten years ago. A program must be developed to continue inspection and maintenance based on condition criticality that ensures rehabilitation and/or replacement of these assets as appropriate. this will assure that all system assets are addressed in a timely fashion. The average footage inspected and rehabilitated per year could reach 250,000 feet of pipe. It is estimated that half of this pipe will need rehabilitation at a cost of \$200 per foot. This is the basis for an asset management program that reinvests 25 million dollars a year to maintain assets in good operating condition throughout the life of the utility.</p> <p>Estimated End Date: 01-July-2049</p>	Local	\$491,762.76	All	All
15	Sewer Cleaning and Pipeline Assessment: Annual Contract	<p>Citywide program of closed circuit TV (CCTV) inspection of existing pipeline condition and heavy cleaning. 20	Sewer Group [4R] - Sugar Creek Basin Trunk Replacement	The replacement of the Sugar Creek Trunk will be performed using large diameter pipebursting technology. Approximately 5,350LF of 24 to 30 inch diameter sewer will be replaced with new pipe ranging from 30 to 36 inches. Field observations have determined that a combination of static and pneumatic pipebursting technologies are suitable as the replacement methodology. Estimated End Date: 04-March-2022	Local	\$12,554		
21	Sewer Group [4R] -East Lake Trunk & Outfall System Capacity Relief Projects (Sugar Creek Basin)	This project consists of replacement of the East Lake Outfall (East), East Lake Outfall (West), and the East Lake Trunk, all within the City of Atlanta jurisdictional boundary. Approximately 10,915 LF of sewer ranging from 12- to 30-inches in diameter is proposed for upsizing. The proposed method will largely be pipebursting.	Local	\$13,006

28	South Area Plant Consolidation	<p>The EPA and EPD are looking seriously at new nutrient removal permit requirements that will require plant upgrades. South River is in need of equipment upgrades and replacement due to the age of the facility and to reliably meet new permit limits. Intrenchment Creek needs a complete updating of equipment if it is to continue operating. This has been deferred because of the possibility of plant consolidation and the expenses incurred under the Consent Decree projects. All flows from these two facilities currently are transported to an outfall that is by Utoy Creek. Flint River Pump station should be designed and built for transport and treatment as a designed facility. Serious consideration should be given to consolidate these facilities into the Utoy facility. The Utoy plant is the newest and best operating facility the City operates. Consolidation will avoid expensive updates needed at South River to meet compliance and avoid costs associated with updating the Intrenchment Creek facility. The Utoy facility should be expanded and evaluated for meeting upcoming nutrient removal permit requirements. This project will reduce operating costs by approximately 15 million per year and eliminate the need for reinvestment capital in two aging facilities.</p>	Local	\$12,373.93	1,10	H,Z

It is currently estimated that an average of 10 million a year will allow for the effective management of the plant infrastructure. Plant projects often exceed this annual value and it is anticipated that larger projects are accomplished from this financial project model. Current critical compliance projects in this category are RM Clayton Compliance, RM Clayton Solids Handling, Utoy Incineration and the South Plant Consolidation projects. These projects are critical to the City of Atlanta's ability to maintain compliance with the tighter operating permits. 1	Adamsville Pump Station 4th Pump	In order to maintain adequate hydraulic pressures and flow rates in the southwestern portion of the distribution system, a hydraulic modeling study performed in August, 1995 originally projected that additional pump capacity would be required at the Adamsville Pump Station by the year 2011. The existing re-pump station is equipped with three pumps of 45 MGD installed capacity and by the early 2000's peak demands required occasions where all 3 pumps were operating. Recent water conservation measures and slower than anticipated growth has actually reduced the amount of time that all 3 pumps operate, however if this occurs when one pump is out of service then system pressures become compromised. A fourth pump of 15 MGD is proposed in order to increase the firm capacity of the station and meet current peak and future demand increases. The building is also required to be extended in order to add the fourth pump.	Local	\$10,642

3	Bellwood Quarry Reservoir	Bellwood Quarry Reservoir is a former surface mining quarry that the City of Atlanta is converting to a 2.4 billion gallon raw water storage reservoir for the drinking water system. The reservoir's water surface will cover approximately 40 acres. Preliminary studies and projected site development have identified that the City cannot adequately construct a secure perimeter service road around the quarry rim without obtaining easements from the adjacent property owner which in this case is the Georgia Power Company. The required easement dimensions are currently being developed.	Local	\$46,068.39	9	G
4	COA Utilities - GDOT & Municipal Projects	Conditions exist where GDOT and other municipalities are improving their roadways, bridges, or easements in which the City has its water and/or sewer utilities. 6	Distribution System Cathodic Protection Restoration	<p>The City of Atlanta has at least 32 miles of steel water mains within the treatment plants and the drinking water distribution system. The cathodic protection system for virtually all of this installed pipe has gone un-monitored for at least a decade. An effort to document all the steel pipe installations, perform field tests to determine the status of the protection systems, and design an adequate system to restore the cathodic protection is critical to protect these valuable assets. While steel pipe is of greatest concern, other metal structures subject to corrosion that is inadequately protected shall be identified.</p> <p>Cathodic Protection is an industry proven method of minimizing corrosive deterioration of steel water mains. 4	Sewer Group [6R] - Custer CSO Basin Infiltration Project (Peplestown)	Extensive flooding occurred in 2011 within and around the Peplestown community. The Mayor proposed an initiative to those citizens to provide capacity relief related to the Custer Avenue CSO. The City engaged BGR Joint Venture to work with the City staff and identify projects that will work in concert to alleviate flooding caused by the stormwater runoff from the Lloyd and Connelly drainage basins. These two basins are part of the City's collection system that is still combined; that is, sanitary sewage and stormwater runoff are combined in a single collection system and conveyed to Custer Avenue CSO for treatment and discharge. BGR prepared a Feasibility Study and Implementation Plan to assess the function, schedule, and cost-effectiveness of planned flood mitigation projects. Those projects include: Short-term -- BMP Installation (Best Management Practices); (PH1 - 2012) Bioretention areas, or rain gardens, are landscaping features adapted to provide on-site treatment of stormwater runoff (BMP) is a term used to describe a type of water pollution control. Historically the term has referred to auxiliary pollution controls. Mid-term-- Permeable Pavers (PH2 - 2013) Long-term-- Atlanta Fulton County Stadium Wet Pond (PH3-2015) Storage Vault The construction of each of these projects will meet the objective of providing 10-20 million gallons of storage and completing the work with all projects by the end of 2015. Community Work Program – NPU Projects

CWP- NPU Projects: Neighborhood Planning Units were asked to submit priority projects for inclusion in the Community Work Program (CWP). The NPU projects are listed separately from the Departmental CWP projects. However, many of the projects have been included in the CWP by City Departments or are listed in approved plans and are therefore included in the CWP.

A total of 618 active projects are listed in the NPU Projects section of the CWP. The NPU Projects are grouped by the same categories as the CWP (see below). NPU Project Categories:

- Economic Development
- Housing
- Natural and Cultural Resources
- Community Facilities
- Transportation System
- Land Use

AHA	Revitalization of Capitol Homes	<p>AHA procured Capitol Gateway, LLC, which is a joint venture partnership of Integral Properties and Urban Realty Partners, to revitalize Capitol Homes into a dynamic mixed-use, mixed-income, multi-generational community. The revitalized community will replace 695 functionally obsolete and severely distressed multifamily units with 122 elderly only rental units, 639 multifamily mixed income rental units, and 191 offsite and 370 onsite affordable and market rate for sale units. Promoting a healthy and sustainable community, the master plan includes recreational green space and an on-site water feature in partnership with the City of Atlanta Parks and Recreation.</p> <p>The revitalization of Capitol Homes was made possible with a \$35 million HUD HOPE VI grant, leveraged by AHA and its private sector development partner to secure \$34 million in private debt, tax credit equity and other development funds. In addition, to support the revitalization initiative, the City of Atlanta has contributed \$13 million and the State contributed \$2 million in infrastructure funds to complete all of the street, streetscape, storm/sewer separation (consistent with the consent decree), water distribution and erosion control improvements in the public right-of-way.</p> <p>The Capitol Homes HOPE VI revitalization program has served as a catalyst for community and economic development generating approximately \$337 million in area investments which include APS investments in new schools, the Capitol Hill Redevelopment plan, Memorial Drive corridor plan, MLK Village development and MARTA Station development.</p> <p>As of May 2010, 122 elderly only rental units, 81 offsite for sale units, 421 multi-family units and 96 special need units all have been completed.</p>	03/31/2011	\$17,600,000	5	V

DWM	Atlanta Streetcar Project	<p>This project provides funding for modifications to DWM utilities which are required in order to accommodate the Atlanta Streetcar Project. The Atlanta Streetcar Project is a 2.9 mile system that runs at-grade, in an East-West loop from the Martin Luther King Jr. national historic site to Centennial Olympic Park traveling on multiple streets with mixed traffic. Siemens Industry, Inc. was awarded a \$17.2 million contract from Metropolitan Atlanta Rapid Transit Authority (MARTA), on behalf of the City of Atlanta and the Atlanta Downtown Improvement District, to provide Atlanta with four new streetcars. The first car is expected to be delivered in September 2012 with revenue service beginning in early 2013. These will be the first streetcars in Atlanta since 1949. According to the GA Transit Connector website, implementing this long-term regional transportation vision will provide core connectivity between existing heavy rail, planned light rail and the Belt Line with the last mile in the heart of Atlanta. Offering enhanced travel options and increased urban mobility, the COA streetcar will play an important role in economic development and job creation along its routes. The budget includes federal, municipal and private funds from sponsors identified above including specific allocations for relocation of DWM public utilities. The total project budget is \$87 million. Of the total, \$45 million has been allocated for the design-build work to be performed under this contract including an allowance of \$8 million for work related to relocation of COA DWM public utilities. DWM will work in conjunction with MARTA to insure that all water, sewer, and storm water lines along the proposed route are adequately addressed during the construction of the first phase of the Streetcar Project.</p>	07/05/2013	\$16,000,000	2	M

DWM	Land Support Services	The Bureau of Engineering Services (BES), Department of Watershed Management shall on some projects need to engage the services of a consultant experienced in Right-of-Way (ROW)/real estate services for the acquisition of permanent easements, temporary easements, fee simple properties, limited services for the exchange of easements, and/or other real estate services to be determined. The Land Support Services project is intended to support the smaller projects that are designed in-house and without the use of outside design services. The projects may arise from Operations, Sewer Rehabilitation Design, Emergencies or various similar internal sources. These projects typically involve sewer realignments, which may be subject to the First Amended Consent Decree (FACD) requirements and are time sensitive. In addition, the BES, in an effort to expedite access for sewer rehabilitation work and to populate the Department's database of permanent easement documents, requires additional easement research assistance from qualified easement/title researchers.	04/30/2013	\$298,428	All	All

3745	Sewer Group [5R] - Peachtree Basin South Fork Storage and Pump Station	The project consists of a proposed 15-mgd deep submersible pump station and 4.5 MG storage cavern to capture and store wet weather flows from DeKalb County. The proposed site is located on the South Fork Peachtree Creek Relief sewer, near the intersection of Peachtree Creek and Briarcliff Road. Wet weather flows, primarily from DeKalb County, will be diverted to the storage facility. The storage and pumping system will significantly reduce the capacity demand on the existing Peachtree Trunk and Peachtree Trunk Relief, both of which experience significant surcharge and incidence of spills during wet weather events. 3661	Revitalization of Harris Homes	<p>AHA procured Harris Redevelopment LLC, which is a joint partnership between Integral Properties and Real Estate Strategies, to develop CollegeTown at West End on the site of the former Harris Homes as a dynamic mixed-use, mixed-income multi-generational community. The revitalization vision to create a quintessential college town environment is based on a strategic partnership with Morehouse College, Spelman College, Clark Atlanta University and Morehouse School of Medicine that integrates the newly developed community with the Atlanta University Center schools. To date, the revitalized community has replaced 760 functionally obsolete and severely distressed multifamily units with 290 elderly-only rental units, 26 special needs rental units, 373 multifamily rental units, 333 on-site for-sale homes and 50 off-site affordable for-sale homes in the surrounding community. To date, 689 rental units and 38 off-site affordable for-sale homes have been completed. The master plan is being updated. The remaining on-site homes and commercial development will be developed as market conditions warrant. The revitalization of Harris Homes was made possible by \$39M in HOPE VI demolition and revitalization grant funds from the U.S. Department of Housing and Urban Development. These funds were leveraged by AHA and its private sector development partner to secure \$54M in private debt, Low Income Housing Tax Credit equity and other development funds. AHA provided an additional \$11M for site remediation and strategic acquisitions. Public Improvement costs to date are \$21.2M and work is complete on these phases which includes construction of public streets, streetscaping, storm/sewer separation (consistent with the consent decree), water distribution and erosion control improvements in the public right-of-way. The City of Atlanta funded \$17.7M consisting of \$7.5M in Housing Opportunity Bonds, \$7M in Quality of Life Bonds, and \$9.5M in Water and Sewer Bonds. All funds are expended. AHA provided \$3.5M to support the installation of public improvements. The CIP funding shortfall for Harris Homes is \$4.5M. The Harris Homes HOPE VI revitalization program has served as a catalyst for community and economic development, generating approximately \$102 million in area investments.</p>	Atlanta Housing Authority	4	T	25710000	Construction

3662	Revitalization of McDaniel Glenn	<p>AHA procured McDaniel Glenn Revitalization LLC, which is a joint venture partnership between Columbia Residential, RHA and SUMMECH Community Development Corporation, to develop Mechanicsville on the site of the former McDaniel Glenn as a dynamic mixed-use, mixed-income multi-generational community. Promoting a healthy and sustainable community, the master plan includes the revitalization of recreational green space at Rosa Burney Park, and the redevelopment of the Dunbar Recreational Center in partnership with the City of Atlanta and the Annie E. Casey Foundation. The revitalized community has replaced 588 functionally obsolete and severely distressed public housing units with mixed-income housing consisting of 155 elderly-only rental units, 658 multifamily rental units, and 110 off-site for-sale homes in the surrounding community. In partnership with the Georgia Department of Community Affairs and the City of Atlanta 25 lease-to-own units are planned for development in 2015-2016. The remaining for-sale homes will be developed as market conditions warrant. The revitalization of McDaniel Glenn was made possible by \$20M in HOPE VI revitalization grant funds from the U.S. Department of Housing and Urban Development. These funds were leveraged by AHA and its private sector development partner to secure \$67M in private debt, Low Income Housing Tax Credit equity and other development funds. The overall Public Improvements budget is \$22.3M with \$14.5M expended to date on the construction of public streets, streetscaping, storm/sewer separation (consistent with the consent decree), water distribution and erosion control improvements in the public right-of-way. The City of Atlanta funded \$11.2M from Water and Sewer Bonds, of which \$10.1M has been expended. AHA provided \$4.4M to support the installation of public improvements. Future public improvement project costs include \$7.8M for the public improvements work associated with the development of the balance of the McDaniel Glenn footprint and the three scattered site annex parcels located within the Mechanicsville neighborhood. This work is planned in the next 60 months and will support the development of 174 for-sale homes. \$1.1M of the \$11.2M in Water and Sewer Bond</p>	Atlanta Housing Authority	4	V	22300000	Construction

3664	Revitalization of University Homes	Integral Development LLC is carrying out the revitalization of University Homes to create a dynamic mixed-use, mixed-income multi-generational community known as Scholars Landing, working collaboratively with the Atlanta University Center schools (Clark Atlanta University, Spelman College, Morehouse College and Morehouse School of Medicine). This development is part of a partnership with Invest Atlanta, and the City of Atlanta to revitalize the westside and is the targeted public housing site for a Choice Neighborhood Implementation Grant application. This revitalization is part of a larger collaborative master planning effort to create a college town environment that will transform three neighborhoods that surround the Atlanta University Center schools and the former University Homes site known as University Choice Neighborhood. This planning effort is funded by \$250K from a 2010 U.S. Department of Housing and Urban Development Choice Neighborhoods Planning Grant and a \$177K match from AHA. The first phase (Veranda at Scholars Landing) to be developed, a 100-unit affordable senior rental development has been completed and 100% occupied. The development was funded with \$13.4M in construction costs solely from private debt and Low Income Housing Tax Credit equity. AHA funded \$2.0M for public improvements and site remediation for the Veranda. The second phase (Oasis) to be developed is a 60 affordable assisted living rental unit deal financed with a \$1,500,000 AHA construction loan, \$9.2M LIHTC equity, a \$450,000 Home Depot grant and \$408,857 in developer equity - total development costs is \$11.55M. This phase has closed, and construction is underway with an expected completion date of 6/30/15. as previously stated, the Oasis was also awarded an allocation of 9% LIHTC from the State of Georgia Department of Community Affairs in December 2012 and represents the first affordable assisted living development funded with Low Income Housing Tax Credits in the State of Georgia. Additionally, AHA has invested \$1.0M for Public Improvements for this phase. 3744	Sewer Group [2R] - Sandy Creek Outfall Replacement Project	The City of Atlanta is presently implementing a program to upgrade its existing sanitary and sewer system to eliminate sanitary sewer overflows. To this objective, the City is proposing a series of system improvements which includes this project. The Sandy Creek Outfall Replacement Project is divided into two phases: Sandy Creek Sewer Replacement Phase I and Sandy Creek Sewer Replacement Phase II.	Watershed Management	9	D	2982536	Close Out
3745	Sewer Group [5R] - Peachtree Basin South Fork Storage and Pump Station	The project consists of a proposed 15-mgd deep submersible pump station and 4.5 MG storage cavern to capture and store wet weather flows from DeKalb County. The proposed site is located on the South Fork Peachtree Creek Relief sewer, near the intersection of Peachtree Creek and Briarcliff Road. Wet weather flows, primarily from DeKalb County, will be diverted to the storage facility. The storage and pumping system will significantly reduce the capacity demand on the existing Peachtree Trunk and Peachtree Trunk Relief, both of which experience significant surcharge and incidence of spills during wet weather events.
