

ATLANTA City of Trees

Benefits of an Urban Forest

In addition to their beauty, trees offer benefits including cleaner air and water, less erosion, safer traffic patterns, and lower crime rates. Scientists have documented these positive effects for environmental and public health.

The benefits trees provide are divided into three categories:

Environmental

Trees improve air quality, reduce energy usage and improve water quality

Economic

Increase property value and rental rates by 7%

Social

Better driving conditions, good health and 52% less crime

Stops
Run Off

Absorbs Dust,
Odor & Noise

1 Tree = Oxygen
For 4 People

Energy Efficient &
Shades Buildings

Improves
Air Quality
