

Affordable Housing Impact Statement

18-R-4447

Requirements

Per the requirements of the City of Atlanta, Georgia Code of Ordinances, Chapter 54, Article I, Section 54-2, Affordable Housing Impact Statements shall include a quantitative or numeric section that shall provide numeric estimates of impacts, quantifying numbers of units impacted at certain levels of Area Median Income (AMI) over the 30-year period following the enactment of the legislation; and a narrative section to provide an explanation of the analyses that led to the estimates.

Narrative Section

The ordinance would reprogram federal grant funds in order to fund the rehabilitation of rental housing units and other activities.

Quantitative/Numeric Section

This legislation, if enacted, is estimated to have a projected impact upon the affordable housing stock of the City of Atlanta over the 30-year period following the enactment of the legislation by:

Adding _0_, preserving _0_, or decreasing _0_ units affordable at 30 percent or below of the Area Median Income (AMI); and

Adding _0_, preserving _0_, or decreasing _0_ units affordable between 30.01 and 50 percent of AMI; and

Adding _0_, preserving _10_, or decreasing _0_ units affordable between 50.01 and 80 percent of AMI; and

Adding _0_, preserving _0_, or decreasing _0_ units affordable above 80 percent of AMI.

Impact

The ordinance would provide \$170,000 in CDBG funding to SUMMECH CDC for the rehabilitation of 10 existing rental units that are reserved for households at or below 80% of AMI. Some of the remaining funds would further contribute to the preservation of units that are already receiving funding for preservation. These units are not counted in this analysis because they have already been accounted for by previous impact statements. Therefore, it is estimated that this ordinance would preserve 10 units of housing that are affordable to households between 50.01 and 80% of AMI. No housing would be added or decreased as a result of this ordinance.

The methodology below is used to determine the affordability of the proposed units for households at certain percentages of AMI.

Methodology for Calculating Affordability

The affordability of units at various levels of AMI, whether for rent or sale, is calculated by first examining the income limits provided by the US Department of Housing and Urban Development (HUD). These income limits are published annually for each Metropolitan Statistical Area (MSA). The income limits provided by HUD in April of 2018 for the Atlanta MSA are shown below:

INCOME LIMITS BY HOUSEHOLD SIZE, FY 2018						
(BASED ON HUD’S AMI OF \$74,800 FOR THE ATLANTA MSA, RELEASED APRIL 2018.)						
Household Size	1 Person	2 Person	3 Person	4 Person	5 Person	6 Person
30% AMI Limit	\$15,750	\$18,000	\$20,780	\$25,100	\$29,420	\$33,740
50% AMI Limit	\$26,200	\$29,950	\$33,700	\$37,400	\$40,400	\$43,400
80% AMI Limit	\$41,900	\$47,900	\$53,900	\$59,850	\$64,650	\$69,450

To determine the affordable rent or home sales price for households at each level of AMI, the following three assumptions are made:

- 1) Rental housing is affordable when it costs no more than 30% of a household’s gross income. Households that pay more than this toward housing costs are considered cost-burdened by HUD.
- 2) Homeownership units are affordable when the purchase price is no more than three times a household’s annual income.
- 3) An average of 1.5 persons will reside in each bedroom of a residential unit.

Following this, the number of persons estimated to live in units with different numbers of bedrooms is determined by multiplying the number of bedrooms by 1.5. See the table below for this calculation:

CALCULATION OF ASSUMED HOUSEHOLD SIZE FROM UNIT BEDROOM COUNT					
Number of Bedrooms	0	1	2	3	4

Assumed Household Size	1	1.5	3	4.5	6
------------------------	---	-----	---	-----	---

This income limit is then taken for the household size that corresponds to the number of bedrooms in the unit, as show in the table above. If the assumed household size is not a whole number, the income limits that correspond to households for the nearest two whole numbers are averaged.

Affordable Rent Calculation

The calculation of affordable rents is determined by first identifying the income limit for the household size using the methodology shown above. Following this, the income limit is multiplied by 0.3 to cap rent at 30% of household income, divided by 12, and rounded up to the nearest whole number to find the monthly maximum rent. See the examples below.

Studio/Efficiency Calculation for 80% of AMI

0 Bedroom (1.5 Person) = 1 Person Income Limit

$$41,900 (0.3) = 12,570$$

$$12,570 / 12 = 1,047.50$$

Rounded up = \$1,048 maximum rent

1 Bedroom Calculation for 80% of AMI

1 Bedroom (1.5 Person) = 1.5 Person Income Limit

$$(41,900 + 47,900) / 2 = 44,900$$

$$44,900 (0.3) = 13,470$$

$$13,470 / 12 = 1,122.50$$

Rounded up = \$1,123 maximum rent

The following rent limits would apply under this methodology:

AFFORDABLE RENTS, FY 2018					
(BASED ON HUD'S AMI OF \$74,800 FOR THE ATLANTA MSA, RELEASED APRIL 2018.)					
Number of Bedrooms	Studio/ Efficiency	1 BR	2 BR	3 BR	4 BR

30% AMI	\$394	\$422	\$520	\$682	\$844
50% AMI	\$655	\$702	\$843	\$973	\$1,085
80% AMI	\$1,048	\$1,123	\$1,348	\$1,556	\$1,736
