The quarry south of Runway 9L-27R has experienced several slope failures in this area due to an eroding earthen berm and failed slope drains. The Runway Safety Area for Runway 27R in this area does not comply with FAA standards. Additionally, poor drainage, vegetation growth, and frequent standing water are major contributors to an increased presence of wildlife. This creates a safety concern for aircraft operations. The work will be performed inside the Airside Operations Area.
